UCF Siemens Phones

Model shown: Optiset-E Advanced Plus with Key Module

Telecommunications offers a line of Siemens Optiset phones and accessories for the UCF community. These digital phones all come with 12 function keys, a 2x24 character display, 3 menu keys and 2 audio control keys.

Models Available

Siemens Optiset-E **Standard**

Siemens Optiset-E **Advance**

Siemens Optiset-E **Advance Plus**

All three models look the same, but have a few specific differences. See the Comparison Chart for more details. We provide a select number of key layouts that have been optimized by our engineers. They will be happy to work with you and help select the best one to meet your communications needs.

Siemens Optiset Comparison Chart

Headset Adapter?	No	Yes	Yes

Accessories

Key Module

Each Optiset Key Module has 16 programmable keys that can be used as line, speed dial or feature keys.

Headsets

Our top three models are listed below. All headsets will require a Optiset headset adapter. Wireless headsets also require a lifter.

V100 Wireless Headset (requires adapter and lifter)
This headset can been worn three ways and pairs easily with most business phones. You can talk up to 300 feet away from the base with 10 hours of talk time (up to 120 hours of standby time).

Supra Plus (requires adapter)
This over –the-head set provides all-day comfort and reliability.

Mirage (requires adapter)
This lightweight over-the-ear piece has a noise-canceling microphone and a Quick Disconnect feature that lets you walk away from your phone while wearing your headset.

Voice Mail

Optiset phones use the Cisco Unity Voicemail system for best results.
