

Polycom® CX5500 Unified Communications Station – Small/Medium Conference Room

Experience 1080p “around-the-table” video with Skype for Business 2015

Features and Benefits

- ❖ The CX5500 provides remote participants with 1080p HD active-speaker video that automatically tracks the flow of conversation.
 - ❖ Unique 360-degree panoramic view of the conference room.
 - ❖ Reduce training costs with simple USB plug-and-play functionality that requires little or no training
 - ❖ Users connect a USB cable to their laptop and use the Skype for Business client they already know—no remote required
 - ❖ Lower support costs and realize a better ROI with increased room usage for collaboration
 - ❖ No need to provision a second conference phone in the room—the CX5500 also doubles as an IP conference phone when not used for Skype for Business video calls
-
