## What is Skype for Business?

Skype for Business is a collaborative application designed to streamline communication within your network. You can message and meet online with your colleagues, share your screen, and work with Office applications all within a single app.

## What do you get with Skype for Business?

- Instant message anyone on the network
- Share your desktop
- Present Office documents
- Schedule meetings

## Instant Messaging

Connect with your contacts in real time and on a moment's notice by using the Skype for Business instant messaging (IM) system. You can instant message anywhere in the application where you see a contact.

## Desktop Sharing

Show your entire screen or just a program to everyone in a Skype for Business meeting or IM conversation.

## Office Document Presentations

Give a PowerPoint presentation to your attendees in a meeting, create a poll to take votes, or use the whiteboard feature to collaborate in real time.

## Meetings

Schedule meetings with your contacts in the Skype for Business client or through Outlook.

## And with Enterprise Voice...

Make and receive calls within the Skype for Business app without using a desk phone.

Find out more by contacting the Service Desk.
